Philippines

CORE TOOLKIT

Frontend
HTML, CSS, Bootstrap 5, JavaScript

Backend Basics
PHP, MySQL, Java (OOP)

Tools & Workflow
Git & GitHub, GitHub Pages, Figma, VS Code

PROFESSIONAL SUMMARY

Design-minded Frontend Developer based in the Philippines specializing in crafting clean, responsive, and mobile-first static websites. Experienced in bridging layout hierarchy with robust code structure using Bootstrap 5 and core JavaScript. Proven capability in delivering beautifully polished web assets deployed to modern cloud presentation workflows.

SELECTED PROJECTS

Measurements Conversion System

C++ OOP CLI

A C++ application that converts various units of measurement, including length, weight, volume, and more, providing accurate results through a simple user-friendly interface.

Web-Based Fragrance Commerce

PHP MySQL JavaScript

An e-commerce platform for fragrances that allows users to browse products, view scent details, manage carts, and place orders online. Built using PHP, MySQL, and Bootstrap.

Personal Portfolio Website

Bootstrap CSS Github Pages

A modern personal portfolio website built with Bootstrap 5 and vanilla JavaScript, featuring dark/light mode, scroll animations, project filtering, and a contact form.

EXPERIENCE & DEVELOPMENT PATH

2026 2nd Year — BSIT, Polytechnic University of the Philippines

Enrolled in Systems Analysis and Design, Database Management Systems, and Object-Oriented Programming. Built this portfolio as a personal project to document my growth and present my work professionally.

2025 1st Year — Core CS Foundations

Completed Introduction to Computing, Computer Programming (Java), and Web Development fundamentals. Built my first full web pages and learned how to structure projects properly with Git and GitHub.

2024 Started BSIT — University Enrollment

Began my IT journey with a focus on programming logic, digital literacy, and the basics of computing. Discovered a genuine interest in web design and front-end development, which has driven every project since.
